

## **Project Design Phase-I**

### **Solution Architecture**

Date	26 October 2023
Team ID	NM2023TMID11714
Project Name	PROJECT - ETHEREUM DECENTRALIZED IDENTITY SMART CONTRACT
Maximum Marks	4 Marks

#### **Solution Architecture:**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Provide specifications according to which the solution is defined, managed, and delivered.
